THARAKA NISANSALA BALASOORIYA

Computer Science Graduate | AI & Agentic AI Development | Software Engineering

+94 70 571 8956 | tbalasuriya2001@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in full-stack software development and AI-powered application development. Currently contributing to Izzy, an AI-powered travel assistant at RAAHI, working on Google Gemini integration, retrieval logic, conversation workflows, and AI response validation. Experienced with Python, JavaScript, TypeScript, REST APIs, FastAPI, Node.js, and SQL databases. Actively developing practical knowledge of Agentic AI, LLM application development, and multi-agent orchestration using LangChain, LangGraph, and CrewAI through hands-on learning and experimentation. Interested in building intelligent AI agents that can understand user requests, use tools, retrieve information, and execute multi-step workflows to solve real-world business problems.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, C, C++, PHP, SQL
AI, LLMs & Agentic AI: Google Gemini API, LLM Integration, Prompt Engineering, LangChain (Learning), LangGraph (Hands-on Learning), CrewAI (Learning), Machine Learning, Computer Vision, MediaPipe
Backend & API Development: Node.js, Express.js, FastAPI, Flask, REST APIs, API Integration, JSON, GraphQL
Frontend Development: React.js, Next.js, HTML5, CSS3, Vite
Databases: PostgreSQL, MySQL, Supabase
Software Testing & Quality: Functional Testing, Feature Validation, Debugging, Issue Reproduction, Regression Testing
Development Tools: Git, GitHub, Docker, VS Code, Jupyter Notebook
Cloud Technologies: AWS (Currently Learning)

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern *June 2026 – Present*
RAAHI Inc. | Remote

- Develop and maintain web application features using React.js, JavaScript, TypeScript, and modern frontend technologies.
- Contribute to backend functionality and API integrations using Node.js and Express.js.
- Contribute to Izzy, an AI-powered travel assistant, working on Google Gemini integration, retrieval logic, conversation workflows, and AI response validation.
- Work on authenticated traveler and professional conversation experiences, including debugging and feature validation.
- Investigate technical issues, improve application behaviour, and collaborate through Git-based development workflows.

AI Developer Intern *March 2026 – August 2026*
Thrimaa Interactive | Remote

- Contributed to AI-enabled business applications, including an AI Hotel Management System and an HR Management System.
- Worked with Next.js, React.js, FastAPI, and PostgreSQL across frontend and backend development tasks.
- Integrated application components and APIs to support system functionality and data flow.
- Investigated technical issues, validated application features, and contributed to software improvements.
- Used Docker in the development workflow and collaborated with team members throughout development.

SELECTED PROJECTS

Izzy – AI-Powered Travel Assistant
Google Gemini API, Node.js, Express.js, Information Retrieval

- Contribute to an AI-powered travel assistant integrated with the RAAHI platform, supporting separate traveler and professional conversation experiences.
- Work on Gemini integration, retrieval improvements, conversation workflows, AI response validation, debugging, and application reliability.
- Project: RAAHI Website

AI Career Assistant
React.js, TypeScript, Vite, Node.js, Express.js, Supabase

- Developed an AI-powered career assistance application supporting job-search and application workflows.
- Worked on frontend functionality, backend services, API integration, and database connectivity.
- GitHub: Source Code | Live Demo: View Application

Agentic AI – Learning & Practical Exploration
Python, LangChain, LangGraph, CrewAI

- Currently exploring Agentic AI frameworks through hands-on Python exercises and practical experimentation.
- Learning LangGraph concepts, including graph structures, state management, nodes, edges, and graph-based workflow execution.
- Exploring LangChain for LLM application development, tool integration, and agent workflows.
- Learning CrewAI concepts for role-based AI agents, task orchestration, and collaborative multi-agent workflows.

Javelin Throw Technique Classification
Python, MediaPipe, Computer Vision, Machine Learning

- Developed a computer-vision research project to classify javelin throwing techniques using pose data and machine-learning methods.
- GitHub: Source Code

Yummy Union – Web Application
Python, Flask, HTML, CSS, JavaScript

- Developed a web application using Flask and frontend web technologies.
- GitHub: Source Code

EDUCATION

Bachelor of Science (Honours) in Computer Science *2026*
University of Jaffna, Sri Lanka

PROFESSIONAL STRENGTHS

- Analytical Thinking and Problem-Solving
- Software Debugging and Attention to Detail
- Team Collaboration and Communication
- Adaptability and Continuous Learning
- Time Management and Task Ownership
