

THARAKA NISANSALA BALASOORIYA

Associate Software Engineer — Computer Science Graduate

Mobile: +94 70 571 8956 E-mail: tbalasuriya2001@gmail.com

LinkedIn: tharaka-balasooriya Git Hub: TharakaNisansala

Professional Summary

Computer Science graduate with a strong foundation in object-oriented programming (OOP) and hands-on experience in full-stack software development, REST API design, database-driven applications, and AI/LLM-powered features using React.js, TypeScript, Node.js, Express.js, Python, and SQL. Practical experience across the full software development lifecycle – design, coding, testing, debugging, and deployment – using Git-based version control. Strong problem-solving mindset and communication skills, with experience collaborating in fast-paced, cross-functional engineering teams. Quick learner, eager to build expertise in C#, .NET, and Angular to contribute effectively to end-to-end engineering solutions.

Technical Skills

Programming Languages: TypeScript, JavaScript, Python, Java, C++, C, PHP — Object-Oriented Programming (OOP)

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs, GraphQL, API Integration

Databases: MySQL, PostgreSQL, SQL, Database Design

AI & Machine Learning: Machine Learning, Computer Vision, LLM Integration, AI-Powered Applications

Development Tools: Git, GitHub, Docker, Postman, VS Code, Jupyter Notebook, Agile/Collaborative Workflows

Professional Experience

Full Stack Developer Intern — RAAHI (Remote)

June 2026 – Present

- Develop and maintain full-stack software application features using object-oriented and component-based design principles in React.js, TypeScript, Node.js, and Express.js.
- Design and integrate REST APIs, improving application functionality, usability, and performance in a fast-paced, collaborative team environment.
- Implement AI-powered chatbot functionality by integrating backend services with website content retrieval and intelligent response workflows.
- Debug application issues, write test cases, and collaborate through Git-based development workflows and code reviews.

Intern – AI Developer — Thrimaa Interactive (Pvt) Ltd. (Remote)

March 2026 – August 2026

- Contributed to AI components of the Hotel Management System and Olympus HRM, supporting real-world, client-facing software products.
- Supported the development and integration of AI-powered application features within a larger engineering team.
- Collaborated with a cross-functional development team in a fully remote, fast-paced environment.
- Demonstrated strong problem-solving ability, adaptability, initiative, and eagerness to learn new tools and technologies throughout the internship.

Academic Projects

AI Career Assistant Platform

Live Demo — GitHub

- Developed and deployed a full-stack, AI-powered career assistant application that analyzes resumes, calculates ATS scores, matches resumes with job descriptions, and identifies skill gaps.
- Implemented AI-powered interview preparation and interview answer evaluation with personalized feedback.
- Built secure authentication and resume analysis history features using JWT and PostgreSQL hosted on Supabase.
- Developed the frontend using React.js, TypeScript, Vite, and Tailwind CSS, with Node.js and Express.js backend APIs and Groq API integration for LLM-powered features.
- Deployed the application using Vercel Serverless with Supabase PostgreSQL for cloud-hosted data management.

Interactive Sales & Profit Analytics Dashboard — Power BI

GitHub

- Developed an interactive Power BI dashboard using 10,000+ sales records to analyze global sales and profitability.
- Created KPI dashboards and visual reports covering regions, countries, product categories, sales trends, and profit margins.
- Implemented interactive filters and slicers for region, country, item type, and order priority to support data-driven analysis.

Recipe Sharing Web Application – Yummy Union

GitHub

- Developed a database-driven recipe sharing platform supporting 200+ recipes and 50+ user accounts.
- Implemented user authentication, CRUD operations, content management, and database integration using object-oriented design principles.
- Technologies: PHP, MySQL, HTML5, CSS3.

Research Experience

AI-Based Computer Vision Framework for Javelin Throw Technique Classification

- Developed a computer vision framework using pose estimation to analyze human movement patterns from javelin throw video data.
- Applied machine learning and deep learning techniques to classify correct and incorrect throwing techniques from sequential motion data.
- Investigated human pose keypoints and temporal movement patterns for automated sports technique analysis.

Education

Bachelor of Science (Honours) in Computer Science

2026

University of Jaffna

Certifications

- Front-End Web Development – University of Moratuwa
- Introduction to Data Science – Cisco Networking Academy
- Python Essentials 1 – Cisco Networking Academy
